DONOR PROCEDURE

In order to ensure transparent and efficient reconstruction, based on the build-back better principle, we developed **new procedure by the rules of international donors**

It combines tested over the years **procurement rules of international organizations** with the most progressive standards of **transparent e-procurement from Ukraine**

In October, we got an official assessment of the World Bank that confirms that **Prozorro e-procurement system is compliant with the procurement rules of WB**

Meanwhile, **USAID project TAPAS** started to pilot our donor procedure for their procurement

Donors' procurement

Purchase configuration:

- Purchase with lots ⓘ
- Electronic auction ⓘ
- Preliminary qualification of participants ⓘ
- Bid price is limited by the expected value ⓘ
- Offer currency is determined by the expected value ⓘ
- Sequential order of proposals consideration ⓘ

The minimum number of bids ⓘ

WHAT MAKES PROZORRO A UNIQUE E-PROCUREMENT SYSTEM

Open source code of the system

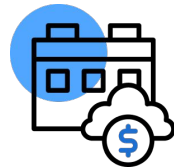

Open API, which makes it possible to create new services based on Prozorro data

Electronic submission of tender proposals

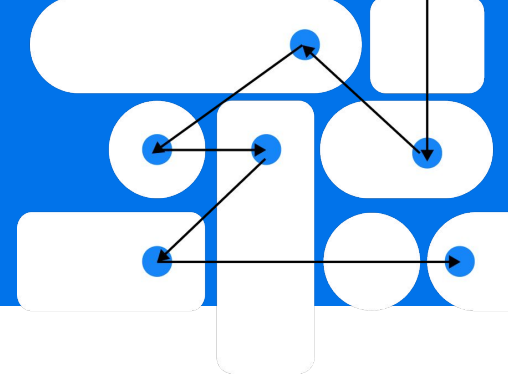

Public BI module for analyzing procurement from different angles

Two-level hybrid system consisting of central database and 12 commercial marketplaces

FLEXIBLE PROCUREMENT FOR INTERNATIONAL DONORS

Moreover, we developed our procedure in such a flexible way that makes it **applicable for other international financial institutions and banks of development to use.**

Each contracting authority can “construct” its own tender procedure that will fit the requirements of a specific international donor

All you need to do is to **choose correct configurations of tender** while announcing the procedure

In the nearest future we will add the possibility to **connect the bank's external approval** on each stage of the procedure

HOW TO START PARTICIPATING in Prozorro Public Procurement as Non-Resident

1. Register

on one of the [authorized marketplaces](#) as a "Supplier"

3. Apply for participation

via the marketplace you have registered on

2. Find the tender

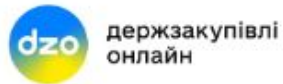

you are interested in on prozorro.gov.ua or on the marketplace you have registered on

4. Offer the best price*

5. Win!

*please note that there is currently no auction stage in open procedures with features

Choose one of
the authorized
marketplaces

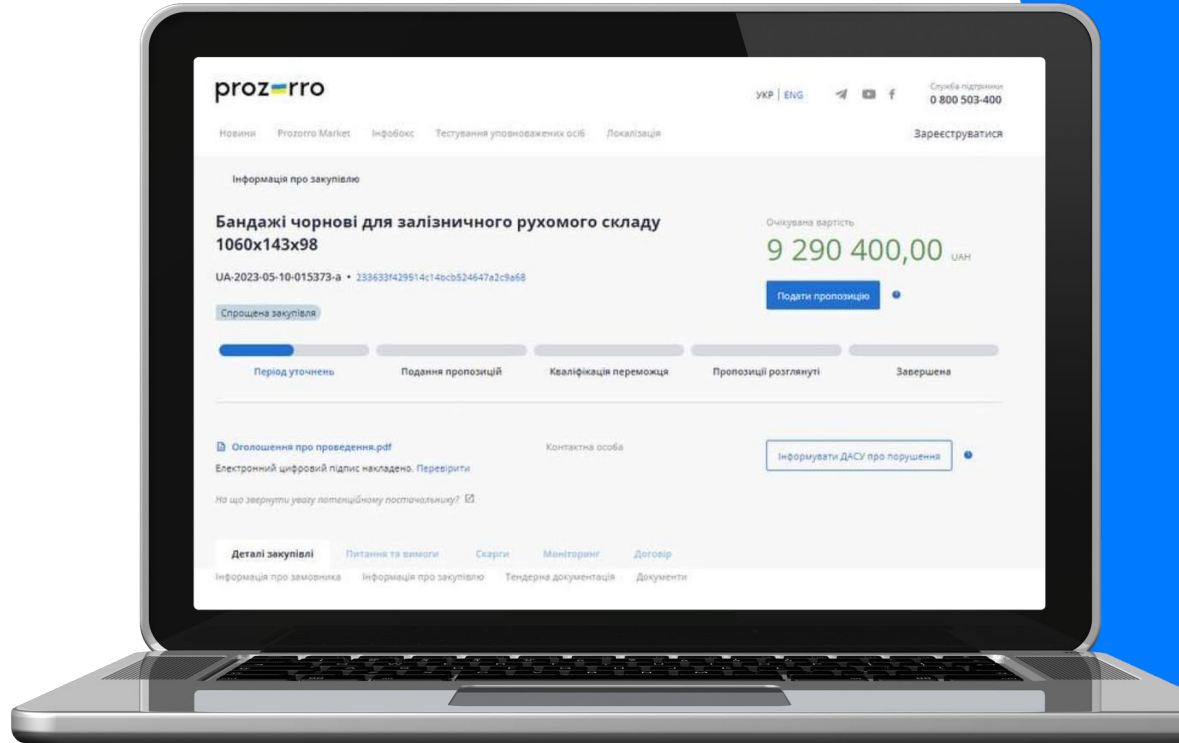

The majority of contracts are awarded through the **open tender procedure**.

The contracting authority may apply one or several **qualification criteria** relating to bidders' equipment and resources, staff and previous experience.

Tenders on the Prozorro portal have received a new interface

- More information about the participant has been added
- Offers have become more structured, with quick links to the main sections of the tender card available in any section.
- **English version of the portal** is coming soon

Restricted procedure

This procedure is **used for large, complex projects** and is still **under development**.

At the **first stage** of restricted tendering, the tenders are qualified to participate in the procurement procedure.

All participants admitted to the **second stage** are invited to submit a tender proposal, which provides information on compliance with the technical, quality and other characteristics of the procurement item, delivery terms, time and place where the work will be done.

Unified rules for public procurement

Antimonopoly Committee:

- Digital appeal
- Online payment for complaints

State Audit Service

- Open monitoring and publication of results

Transition from tender committees to personal responsibility of authorized persons

REGISTRATION PROCESS

Registration

Step 1 Step 2 Step 3

* Type of business entity (person):
Non-resident

* Country of Registration
Choose your country

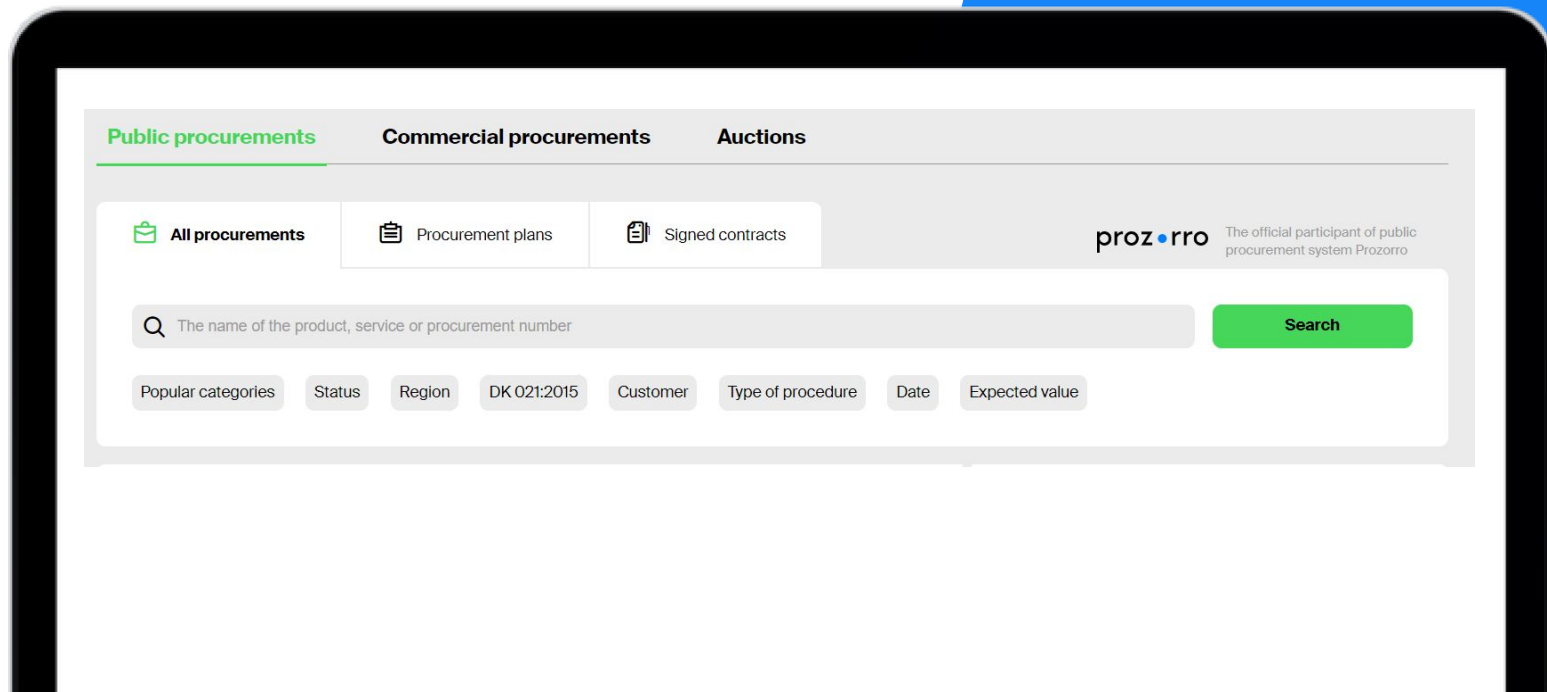

* Unique organization code in the country of registration:
Enter a unique organization code

* The name of the company according to the statutory documents:
[Empty text field]

* Legal address:
Country, city, street, apt\unit

 To confirm the information about the company, upload the registration certificate
